

PEARL CARDS

PRODUCT DESCRIPTION

Our 14pt Metallic Pearl paper is a unique stock that shimmers in light when viewed from different angles. The stock itself is embedded with Pearl fibers that give the paper an overall smooth, metallic look. Printing on this stock will give your CMYK colors a subtle shimmer, however, heavy ink densities or coverage may diminish the effect. Pearl stock is being offered on Business Cards, Postcards, Announcement Cards and Greeting Cards. A Round Corner option is available on Business Cards and Announcement Cards. Our half scored Greeting Cards and flat Announcement Cards are available with matching Pearl Blank Envelopes as an add-on.

- Matching Pearl Blank Envelopes include A2, A6, A7, and 6.5"X6.5" sizes
- Next-Day option available for faster turnaround
- Various Business Card sizes available in addition to the standard 2"X3.5" size
